Application

are heavy duty flexible rubber cables for use under high mechanical load conditions in dry or damp rooms and outdoors. Continuous operational movements, forced guidance or use on cable reels or rollers or under tensile load with a conductor cross-section of more than 15 N/mm² are not allowed.
Single-core designs of flexible rubber cables can be used for short-circuit and earth-leakage-proof installations according to VDE 0100-520.
Application range:
According to EN 50565-2 in dry and damp rooms as well as outdoors in compliance with all standardised cable properties; for medium mechanical loads, e.g. for equipment in industrial and agricultural workshops, electric tools, portable motors, machine tools
