DRILL SDS PLUS PT Z4 5X115

Hammer drill Luna Pyra-Tec with SDS-Plus attachment. The drill has a 4-fluted tungsten carbide crown bit and high alloy, heat treated steel in the drill core. The pyramid shaped drill tip provides excellent results in reinforced concrete. The drill cuts through the reinforcement without tracking to the side. The result is a straight centred hole with a reduced risk of cracking, which means a strong and secure fastening. The drill has an open, optimised 4-fluted spiral, ensuring efficient removal of drill dust. Drill speed is not reduced by the drill dust so the drill can work more freely and efficiently. Luna Pyra-Tec hammer drills give excellent results regarding hole tolerance and centering with a long service life. For drilling in concrete with or without reinforcement, natural stone, brick and other similar materials.

PROPERTIES

- **Total length** 115mm
- **ETIM class code** EC000945
- **For processing** Reinforced lightweight concrete , Concrete , Granite , Stone-based building material
- **Auger length** 50mm
- **Quantity in pack** 1
- **Diameter** 5mm
- **No. of flutes** 4qty
- **Drill material** Tungsten carbide tip
- **Type of attachment** SDS-plus
